Subject: A10 draft progress report
A10 PRP chapter - Apr 18 2016.docx

Here's the compiled draft including: Intro (from me); timeline figure (from me); Nancy's SOL input (edited); Ram's input (edited); some images to consider (from me); and just need Paul's CSMI text and a review of the complete thing by Ram and Paul and this is hopefully done as a draft that can be submitted to the Secretariat (today?).

I think Liz is the US GLEC Secretariat member for Annex 10.. so cc'ing her as well as Jamie if I have that wrong.

Subject: RE: draft progress report-

I got a message from Bob that his involvement only started six months ago, other than Lake Superior worksheets he doesn't have any other things. I think we need Glenn and Paul to write this- meanwhile I tried these

lines that I grabbed from here and there..

The CSMI was designed to coordinate binational priority science and research activities in the Great Lakes basin with an emphasis on enhanced monitoring and research field activities which are conducted on one lake per year on a five year rotating cycle. The Annex leads identify research, monitoring and other science priorities to assess threats to water quality and support management actions. To address these priorities, the Annex 10 CSMI Task Team works with governmental and academic scientists to develop, coordinate, and allocate resources for specific research activities for each lake on a five year rotating basis. The CSMI-focussed science and monitoring field work has been undertaken in 2013 in Lake Ontario, 2014 in Lake Erie, 2015 in Lake Michigan. Field monitoring is underway in Lake Superior and will be undertaken in Lake Huron in 2017.

I'm hoping that Glenn Warren and Bob Rowsell submit a paragraph or 2 on the CSMI today. If I get anything I'll forward it along.

Ram - I've written a short Intro/overview. I have the Indicators text from Nancy (have some minor edits); I'll work with your Data Sharing text and look over what Chitra sent (but that's pretty long); I'll have to wait for Paul's CSMI text to insert that.

The last thing is if you or Paul want to highlight CDN and US domestic actions related / that support the Annex 10 commitments. You can also use this area to highlight a cool science activity from the dept Ram.. was there S&T work that was done for another annex that would be a cool domestic story to highlight very briefly? I missed the S&T science day this time around but last time I attended there was some interesting work highlighted. Even if you don't have the full story let me know if you have an idea for this CDN domestic activity/story and we'll insert it as a placeholder.

The deadline is Mon Apr 18th. I'll try and have a complete draft with whatever input I have gone over so far by mid-Monday if I can.

Ash

Subject: draft progress report-
Importance: High

Hi Nancy and Ash, I attached a very crude draft- could you please take a look at it.

I think we need to send atleast a draft to secretariat by evening.

I am not sure I have all the information to type some paragraphs for this draft.

I typed a few lines on data management and science priorities reporting.

Paul is still away- he promised CSMI and introductory paragraph, what kind of introduction is needed for this Annex- I will try to do it?

I am around until 4 PM today and if you have some ideas pl let me know.

Thanks Ram
